PROFILE

Electronic Engineer with a Master's in Full Stack Web Development and experience in software, infrastructure and telecommunications. I build clear, stable and results-driven web applications, from solution definition through deployment and operation.

EXPERIENCE

Web Application Developer · Freelance 2024 – Present

Development of scalable web applications for multiple clients, including automation, document management, accreditation, professional scheduling and underwater inspection systems.

Full Stack Developer · Sotex Jan – Dec 2024

Digitalization of business processes for laboratories, naval maintenance and library management. Built systems used in operations with more than 3,000 monthly entries.

Field Engineer · Claro Chile SA Feb 2009 – Jan 2023

Operation and maintenance of critical telecommunications infrastructure: data centers, fiber optics, microwave links and cellular networks, focused on service continuity and technical support.

SELECTED PROJECTS

Tiro Score Next.js · Convex

Real-time scoring and ranking for shooting competitions.

Teslo Manager Next.js · Cloudflare

Accreditation, document, compliance and expiration alert management.

VLM360 Next.js · PostgreSQL

Technical management and reporting for sonar-based underwater inspections.
